## NEW COMMITMENT CRIMINOGENIC NEEDS

The Arizona Department of Juvenile Corrections (ADJC) Research and Development Bureau has created a new risk to re-offend instrument called the Recidivism Risk Instrument (RRI). This new instrument was validated on a cohort of recent releases from ADJC secure care. The needs listed below were found to be predictive of a juvenile's likelihood of returning to custody with ADJC or the Arizona Department of Corrections (ADC) and comprise most of the RRI variables.

## Length of Stay Served

Although most juveniles committed to the Arizona Department of Juvenile Corrections (ADJC) are given a court-ordered minimum length of stay by a juvenile court judge, the department has the discretion of keeping a child until they have completed their appropriate program. The table below indicates the average length of stay a child stayed in a secure facility within each status.

## DISCHARGES

A discharge is when a child is released from ADJC custody. This may occur for different reasons. A child may become an adult at age 18, be transferred to the adult court jurisdiction, or may have earned an absolute discharge.
